

AMBIC®

UniDipper™

Model No. ADC/160

The Ambic UniDipper 'low profile' dip cup design makes it suitable for dipping cow, goat and sheep teats. It is also ideal for dairy farmers who prefer a 'side action' dipping routine, such as when dipping in a stanchion barn.

- First fully non-return lateral dip cup
- Unique DipWell™ chemical reservoir and anti-drip lip to prevent chemical spillage (patent pending*)
- Easily converted from single to twin tube version to suit all teat dip types, including thicker barrier dips
- Ergonomic design for easy 'side action' dipping
- Handy belt hook
- Available in a range of colours - ideal for pre- and post- dipping.
- Legendary Ambic quality

AMBIC®

StandardDipper™

Model No. ADC/100

The StandardDipper was the world's very first dip cup, developed by Ambic in conjunction with the National Institute for Research in Dairying (NIRD). This pioneering work established the importance of post milking teat disinfection in the control of mastitis.

- Large angled cup for easy application and maximum teat coverage
- Specially designed splash proof lip to overflow chamber to reduce spillage and overflow
- Soft squeeze bottle for ease of use
- Available in range of colours for pre- and post-dipping applications
- Convenient belt hook

• Legendary Ambic quality

The Original No.1

AMBIC®

Non Return DipCup™

Model No. ADC/120

The Ambic Non Return Dip Cup was developed from the pioneering StandardDipper to become the No.1 selling dip cup in the world. The innovative non return design ensures clean, full strength chemical for your cows' teats. Contaminated chemical cannot get back to the reservoir bottle.

- Incorporates the original design features of the Standard Dipper
- Non return design prevents contaminated chemical returning to dip cup bottle
- Clean, full strength chemical for each cow's teats
- Specially designed splash proof lip and overflow chamber to reduce spillage and overflow

• Soft squeeze bottle for ease of use

- 30ml dip cup capacity
- Available in range of colours for pre- and post-dipping applications
- Convenient belt hook
- Legendary Ambic quality

leading best practice in livestock health management

AMBIC®

MiniDipper™

Model No. ADC/125

An alternative version of the popular Original No.1 Non Return Dip Cup, the MiniDipper has a 15ml dip cup capacity to suit smaller teated animals.

- Non return design prevents contaminated chemical returning to dip cup bottle
- Clean, full strength chemical for each cow's teats
- Specially designed splash proof lip and overflow chamber to reduce spillage and overflow
- Soft squeeze bottle for ease of use
- 15ml dip cup capacity
- Available in range of colours for pre- and post-dipping applications

- Convenient belt hook
- Legendary Ambic quality

AMBIC®

TwinDipper™

Model No. ADC/120-TT

An alternative version of the popular Original No. 1 Non Return dip cup designed for ease of application of thicker, barrier type or 'film forming' dips which have a higher viscosity.

- Two tubes provide the same volume of chemical for half the squeeze
- Non return design prevents contaminated chemical returning to dip cup bottle
- Clean, full strength chemical for each cow's teats
- Specially designed splash proof lip and overflow chamber to reduce spillage and overflow
- Soft squeeze bottle for ease of use

• 30ml dip cup capacity

- Available in range of colours for pre- and post-dipping applications
- Convenient belt hook
- Legendary Ambic quality
